ဗ	-! - FUNCTION: THIS PROTEIN SHOW BOTH ACTIVITY TOWARD TYROSINE-
2	PROTEIN PHOSPHATE AS WELL AS WITH SERINE-PROTEIN PHOSPHATE.
	-! - CAŢALYTIC ACTIVITY: PROTEIN TYROSINE PHOSPHATE + H(2)O -
8	PROTEIN TYROSINE + ORTHOPHOSPHATE.
ყ	-! - SIMILARITY: BELONGS TO THE NON-RECEPTOR CLASS OF THE PROTEIN-
8	TYROSINE PHOSPHATASE FAMILY. DUAL SPECIFICITY SUBFAMILY.

Nature 359:644-647(1992).
-! FUNCTION: DUAL SPECIFICITY PHOSPHATASE THAT DEPHOSPHORYLATES MAP
-: FUNCTION: DUAL SPECIFICITY PHOSPHATASE THAT DEPHOSPHORYLATES MAP
KINASE ERK2 ON BOTH THR-183 AND TYR-185.
-! CATALYTIC ACTIVITY: PROTEIN TYROSINE PHOSPHATE + H(2)0 -
PROTEIN TYROSINE + ORTHOPHOSPHATE.
-! INDUCTION: BY OXIDATIVE STRESS AND HEAT SHOCK.
-! SIMILARITY: BELONGS TO THE NON-RECEPTOR CLASS OF THE PROTEIN-
TYROSINE PHOSPHATASE FAMILY. DUAL SPECIFICITY SUBFAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   44 LFWKGSPQYTHVNEVWPKLYIGDEATALDRYRLQKAGFTHVLNAAHGRWNVDTGPDYYRD 103

-i- FUNCTION: THIS PROTEIN SHOWS BOTH ACTIVITY TOWARD TYROSINE-PROTE: PHOSPHATE AS WELL AS WITH SERINE/THREONINE-PROTEIN PHOSPHATE (BY
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     PROTEIN TYROSINE + ORTHOPHOSPHATE.
SUBCELLULAR LOCATION: NUCLEAR (BY SIMILARITY).
SIMILARITY: BELONGS TO THE NON-RECEPTOR CLASS OF THE PROTEIN-
TYROSINE PHOSPHATASE FAMILY. DUAL SPECIFICITY SUBFAMILY.
SIMILARITY: CONTAINS THE CDC25 HOMOLOGY DOMAINS 2 A AND B (CH2
DOMAINS A AND B).
                                                                                                                                                                       20-AUG-1999 (Rel. 38, Last sequence update)
20-AUG-2001 (Rel. 40, Last annotation update)
DUAL SPECIFICITY PROTEIN PHOSPHATASE 5 (EC 3.1.3.48) (EC 3.1.3.16)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  14.5%; Score 168.5; DB 1; Length 384; 31.5%; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              dual specificity phosphatase (EC 3.1.3.-) 2 - mouse
N.Alternate names: mitogen-induced nuclear protein-tyrosine-phosphatase PAC-1
C.Specias: Mus musculus (house mouse)
C.Date: 03-Nov-1995 #sequence_revision 03-Nov-1995 #text_change 24-Apr-1998
C.Accession: B57126
R.Rohan, P.J.: Davis, P.; Moskaluk, C.A.; Kearns, M.; Krutzsch, H.; Siebenlist Aritie: PAC-1: a mitogen-induced nuclear protein tyrosine phosphatase.
A.Reference number: A57126; MUID:99206122
